

Self Contained Systems

We Make the World's Best Foam!

Self Contained Systems come with their own power source (engine). Thus there is no need for a PTO system. Water tanks and foam tanks are optional. These systems may also be equipped with a Roll Out Skid to improve access for servicing. This is normally done when the system is in an enclosed truck body.

How to design a Roll Out Skid System

A Skid-Mounted System can come with a water tank (350 US gallons) mounted on the skid, or, you can mount the water tank independently (most prefer the tank on the skid). So a skid unit will have either two (Snuffer & skid) or three (Snuffer, water tank & skid) components that need to be ordered:

1. When ordering a Snuffer as a stand alone (water tank not on skid) - order Snuffer and short skid. Check for plumbing kits.
2. When ordering a Snuffer that will have a Tuff Built water tank on the skid - order Snuffer plus long skid plus water tank plus plumbing kit.
3. When ordering a Snuffer with a water tank that you will supply - order Snuffer plus long skid plus plumbing kit. **IMPORTANT** provide drawings, fitting placements and dimensions to Tuff Built to make sure the plumbing kit is correct for your tank.

Watertank on Skid				Watertank Not on Skid		
Snuffer Model	Roll Out Skid	Skid Part Number	Price:	Roll Out Skid	Skid Part Number	Price:
0090-040	Skid with Roll Out: 96"	850226		Skid with Roll Out: 44"	850230	
0125-040	Skid with Roll Out: 96"	850227		Skid with Roll Out: 44"	850231	
0125-060	Skid with Roll Out: 96"	850228		Skid with Roll Out: 44"	850232	
0250-070	Skid with Roll Out: 96"	850229		Skid with Roll Out: 44"	850233	

Don't Forget! Tuff Built Products can provide you with a poly water tank. We can also provide the plumbing kit to attach any water tank to your Snuffer.

Call for more information.

Note: A 350 US Gallon (maximum size) water tank can be mounted onto the 9.0 ft Skids. The 44 inch Skid is designed to only mount the Snuffer System.
