## How to Use

### Kit includes:

1 Durable, Wheeled Heavy Duty Plastic Transport & Storage Case

13 #10001 Single Tuff Steps

26 #10020 Retaining Pins

This kit will provide safe access for between 5 meters (16 feet) and 10 meters (33 feet).

Remove Tuff Step (#10001) from Case.

Set Adjustable Supports (Secure with Pin if Appropriate) so Tuff Step will Provide Level Footing When Placed on Slope.

Place Tuff Step (#10001) on Slope in Desired Location. Press Firmly in Ground so that Teeth on Step are Securely Set into Slope. Tuff Step (#10001) May Either be Placed Together or Placed up to 30 Centimeters (1 foot) apart.

If Placed Together Place Upper Tuff Step (#10001) so that Bottom Anchor Holes Overlap the Top Anchor Holes of the Lower Unit. If the Slope has Loose or Unsettled Soil or Longer Term Use is Desired Set the Retaining Pins (#10020) into the Top Anchor Hole of the Tuff Step (#10001) and Press Firmly into the Ground.

### Specifications:

Total Kit Weight 51 Kg. (112 Pounds); includes wheeled case

Kit contains: 13 #10001 Tuff Step

26 #10020 Retaining Pins

Kit Will Provide Safe Access for Between 5 and 10 meters (16 and 33 feet).
